25X1A

LOCATION

5 nm southwest of Sumgait

MAP REFERENCE

ACIC series, scale 1:200,000

REQUIREMENT

NSA/SOC/79-67

NPIC PROJECT

11374AF/67

Basic Operational Components:

- 1 Microwave mast
- 1 Control building

IMAGERY ANALYSIS: This probable microwave facility is secured and is on the eastern end of a ridge, at an approximate elevation of 150 feet above sea level and approximately 250 feet above the level of the Caspian Sea, which is 92 feet below sea level. The components of the facility include a [redacted] guyed mast with probable microwave antennas at its crown and a [redacted] control building at the base of the mast. There are also 2 support buildings within the compound. Because of the extensive area defined by the security fence, it may be postulated that there are other antennas within the compound.
